

# Telepharmacy by keycentrix™

Connect pharmacists to your pharmacy in a brand-new way. Telepharmacy by keycentrix™ opens up new possibilities for involving pharmacists remotely, via instant virtual connection, right inside of Newleaf®.\*

## REMOTE DRUG VERIFICATION

Pharmacy technicians can take photos of drugs, labels, and packaging which the remote pharmacist can access inside of Newleaf. The pharmacist can then approve inside the system, allowing the prescription to move to the next stage of workflow.

## VIRTUAL PATIENT CONSULTS

No pharmacists onsite or available for a consult? A video window inside of Newleaf allows onsite patients to connect to pharmacists virtually for consults and questions. Pharmacists can then leave their notes from each consultation directly in the system.

Allow your pharmacy more options to run efficiently and provide consistent, high-quality patient care.

Contact [sales@keycentrix.com](mailto:sales@keycentrix.com) or call (800) 444-8486 to learn more about Telepharmacy by keycentrix™ and schedule your custom demo.

\*Requires more than one instance of Newleaf, installed at two or more locations.

# Telepharmacy *in action*

## KEY ADVANTAGES

The ability to complete verification checks and consults when no pharmacist is onsite, or when there are no pharmacists available • *Option for additional pharmacy locations that are not limited by pharmacist availability* • Temporary or ongoing ability to connect to pharmacists who work remotely

### SCENARIO A

- 1 The pharmacy technician needs a verification check, and there is no pharmacist on site/available.
- 2 Within the Dispensing function in Newleaf, the pharmacy tech can fill in the appropriate information and upload photos of the prescription (label, container, pill type, etc.) for the remote pharmacist to check.
- 3 The pharmacist checks the information and photos, then approves and records notes as needed.

### SCENARIO B

- 1 A patient needs to speak with a pharmacist about their medication, but there are no pharmacists onsite/available.
- 2 Using the Consultations function in Newleaf, a video screen connects the patient to a pharmacist at another location.
- 3 The remote pharmacist is able to consult with the patient before they leave the store.
